Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Friday 27 Jan 2023 until 23:59 on Saturday 28 Jan 2023

Forecast Issued on Thursday 26 Jan 2023 at 16:48

Confidence: High confidence for settled conditions for the start of the period with cold conditions persisting. Poor visibility may become a hazard on Friday and Saturday with the risk of extensive mist and fog or freezing fog. Turning milder for a time on Sunday but lower confidence around the timing of milder air arriving.

Headline for Friday 27 Jan 2023: Dry start but quite dull with low cloud, mist and fog forming for much of the area.

Mountain weather hazards on Friday 27 Jan 2023

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Medium Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** No Likelihood

Forecast for Friday 27 Jan 2023

Weather: Mostly dry overnight but mist and fog, perhaps freezing fog patches will form readily especially around dawn when winds are light, a frost is also expected. A cloudy day ahead cloud with mist and fog patches readily forming especially around eastern hills, perhaps a few brighter spells in the west.

Chance of cloud-free hill tops above 600m: 60% falling to 30% as mist and fog forms during the day.

Low cloud and visibility: Layers of scattered cloud above 400m are likely to affect the mountains in the early morning with mist and fog lingering. Visibility will be moderate or poor in mist and fog, perhaps brighter with better visibility in the west at times.

Meteorologist's View

A mainly dry settled day, feeling cold at times. The main hazards are mist and fog affecting visibility.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Thu 26 Jan 2023	0mm	0.6mm	0.8mm

Forecast for Saturday 28 Jan 2023

Weather: Remaining cold and mist and fog/freezing fog likely to be quite extensive at first on Saturday morning, otherwise a dry start but some drizzle or light rain possible in the afternoon. Quite dull at times during the afternoon with further mist and fog a possibility by the evening.

Maximum wind: Light westerly winds 10-15mph.

Chance of cloud-free hill tops above 600m: 60% falling to 40% with low cloud associated with fog and light rain and drizzle which moves south during the day.

Low cloud and visibility: Scattered cloud layers above 600m in the morning will become more broken above 400m in the afternoon with poor general visibility expected in fog patches and drizzle, visibility may be very poor at times where the fog is most prevalent.

Temperature: **Valleys:** Plus 1 rising to 4 Celsius.
At 600m: Minus 1 Celsius rising to plus 2 Celsius.
Freezing level: 800m rising to 1000m for a time.
